The Burning Bush
 Ex 3:1-12

**Listen to the
 Voice of creation**
 SEASON OF CREATION 2022

Season of Creation 2022 Program

The **burning bush** is the Symbol for the Season of Creation 2022. Today, the prevalence of unnatural fires is a sign of the devastating effects that climate change has on the most vulnerable of our planet. Creation cries out as forests crackle, animals flee, and people are forced to migrate due to the fires of injustice.

On the contrary, the fire that called to Moses as he tended the flock on Mt. Horeb did not consume or destroy the bush. This flame of the Spirit revealed God's presence. This holy fire affirmed that God heard the cries of all who suffered and promised to be with us as we followed in faith to our deliverance from injustice. **In this Season of Creation, this symbol of God's Spirit calls us to listen to the voice of creation.** We'll touch all [Seven Laudato Si' Goals](#).

Date	Seven Laudato Si' Goals	What
Thu, Sept. 1	6 Ecological Spirituality	Opening Event for the Season of Creation 2022
Fri, Sept. 9	7 Community Resilience and Empowerment	Film Luncheon – Big Oil's Last Lifeline: Part 1 - Houston, Texas, 2022

9 September, 12:00 P.M. (Noon) – 1:00 P.M.

Season of Creation Film Luncheon – Big Oil's Last Lifeline: Part 1 - Houston, Texas, 2022; Film Screening & Discussion

As we follow the toxic trail of the petrochemical industry, we hear from some of the bravest advocates who currently reside in Houston, Texas that are being exposed to these petrochemical toxins putting them at risk of losing their lives all for the monetary greed and profit of the oil, gas, coal, and petrochemical industries. "Big Oil's Last Lifeline" is a three-part documentary series sounding the alarm on the petrochemical industry's impact on Black, Brown, and Indigenous communities. There are environmental and climate injustices happening all over the planet, but particularly along the Gulf Coast of the Mississippi River and the Ohio River Valley. These injustices have strategically targeted low-income communities where the majority of black and brown U.S. citizens call home.

In this context remarkable: Dr. Friederike Otto: "In 2017, hurricane Harvey brought devastating rains & the reality of climate change to Houston & showed me that silence in the face of such events is really not an option anymore for scientists. I wrote my science story of Harvey in ANGRY WEATHER. Heat waves, Floods, Storms, and The New Science of Climate Change. Greystone Books: 2020."
